## Error Codes in This Article

## Error 38

### A Meal Component was Missing from the Infant Meal

This error is generated when Breakfast, Lunch, or Dinner is missing one or more components, assuming menu edit checks aren't skipped per your policies.

Return to Top

## Error 39

### A Dr's Statement has not Been Received for the Special Diet Child(ren) Served During the Month

This error is generated when a child is marked as having special diet in the **Allergies/Conditions** tab on the View Child page, but the **Diet Statement on File** slider is set to **No**.

Return to Top

## Error 40

### Special Diet Statement on File for Given Child(ren) is Expired

This error is generated when a child is marked as having a special diet in the **Allergies/Conditions** tab on the View Child page, but the child is claimed on dates that fall after the date entered in the **Expiration** box for the Diet Statement or if the Expiration box is blank.

Return to Top

## Error 41

### The Child was not Yet Enrolled as of Meal Date

This error is generated if a child is claimed on dates that come before the Original Enrollment Date on the View Child page (or the first of the month, depending on your policies).

> **Note:** This edit check is skipped for At-Risk centers and the At-Risk portion of a claim for regular centers that also operate At-Risk programs.

Return to Top

# Error 42

### The Child is Not Yet Born as of Meal Date(s)

This error is generated if a child's date of birth falls after a meal date. This typically would only happen if data is changed for a child after the child has been claimed.

Return to Top

# Error 43

### The Child was Claimed After the Child was Withdrawn from Care

This error is generated if a child is claimed after the date on which they were withdrawn from care. When withdrawing children, you enter an effective date, which is the last date a child can be claimed (depending on your policies).

> **Note:** Children stay in the system when being withdrawn. Instead of being removed, they are changed to Withdrawn status. This error is generated for all non-At-Risk meals if a child is claimed after the child's withdrawal effective date. This edit check is skipped for At-Risk-only centers and emergency shelters.

Return to Top

# Error 44

### A Pending Child was Claimed — No Signed Enrollment is on File

This error is generated when you claim a pending child. Pending children are disallowed by default. These are children who were enrolled, but who have not yet been activated. Your policies may affect whether this error is generated.

# Error 45

## The Child is Older than the Center's License Allows

This error is generated if you claim a child who is over the age of 13 as of the claimed date. Migrant workers' children and children marked as special needs are exempt from this requirement. Also, children in At-Risk programs are allowed until they turn 18 as of the beginning of the school year (so they could be claimed at 19 in some cases).

# Error 46

## The Special Needs Child is Older than the State's Max Allowable Age for Special Needs Children on the Given Meal Dates

This error is generated if a special needs child is older than the state-defined policy for maximum age. There is no limit by default, but some states restrict participation to those under 18.

# Error 47

## Special Needs Child was Claimed, but Documentation is not On-File

This error is generated if a special needs child is claimed and the child is over the age of 13. This error is subject to your policies if the **Statement on File** slider is set to **No** in the CACFP tab on the View Child page.

# Error 48

## The Migrant Child is Over 15 Years of Age

This error is generated if a center claims a migrant worker's child who is over the age of 15 as of the claimed date.

also operate At-Risk programs.

# Error 49

## A Child was Served After the Child's Enrollment Expiration Date was Reached

This error is generated if a child is claimed after the enrollment expiration date or after the current expiration date.

**Notes:** This edit check is skipped for At-Risk centers/the At-Risk portion of a claim for regular centers that also operate At-Risk programs. The **Enrollment Expiration Date** and **Enrollment Date** values are set on the **View Child** page.

# Error 50

## School Aged Child Served a Meal when Child Should Have Been in School

This error is generated if a child is determined to be school-aged and is served an AM Snack or Lunch on a weekday. This edit check is skipped if you indicate that the child is out of school for that day.

**Note:** Each state has its own logic for determining what defines a school-aged child. For example, this could be children five (5) years of age and older as of the date of the meal. KidKare Food Program has been configured with rules specific to your state. Typically, but not always, you can overrule this setting by adding a school to the child's record in the **School** tab on the **View Child** page.

# Error 51

## Child Served More than 2 Meals & a Snack or 2 Snacks & a Meal

This error is generated if a child is served more meals/snacks than is allowed in a given day. KidKare Food Program disallows snacks before a meal, and it disallows Breakfast before Lunch or Dinner to maximize the amount of money received.

# Error 52

## Meal Over Capacity

This error is generated if more children are claimed at a meal than are allowed based on the maximum capacity recorded in the **License** section of the **Site Details** page. It disallows children in excess of capacity.

Return to Top

---

# Error 53

## For-Profit Center Does not Have at Least 25% Free or Reduced

You are subjected to this edit check if your center is not specifically designated as Non-Profit during account setup. The system uses the same rules as to whether a child is participating in CACFP when determining which children factor into analysis.

> **Note:** This edit check is skipped for At-Risk-only centers and emergency centers.

Return to Top

---

# Error 54

## Child Birth Date is Missing

This error is generated for any child who does not have a date of birth on file on the View Child page.

Return to Top

---

# Error 55

## No Blended Rate is on File for This Center

If you are using a blended rate (i.e., not Actuals), you must have calculated blended rates at least one time before processing the claim. This can be done automatically if you set the **Would You Like to Calculate Blended Rates While Calculating** slider to **Yes** on the **Claim Details** page. If you haven't done this, the system does not know what rates to apply to the claim, and this error is generated.

Return to Top

---

# Error 56

### Child Enrollment Date is Missing

This error is generated for any child who is missing an **Original Enrollment Date** on the **View Child** page.

Return to Top

---

# Error 58

### A Child was Claimed at a Meal that is not Approved on the Child's Enrollment Form/File

This error is generated for children claimed at a meal that isn't selected in the **CACFP** tab on the **View Child** page.

> **Note:** This edit check is skipped for At-Risk only centers, emergency shelters, and At-Risk meals for children enrolled in dual-licensed centers.

Return to Top

---

# Error 59

### A Child was Claimed on a Day of Week that is not Approved on the Child's Enrollment Form/File

This error is generated for children claimed for a day that isn't selected in the **Schedule** section of the **View Child** page.

> **Note:** This edit check is skipped for At-Risk only centers, emergency shelters, and At-Risk meals for children enrolled in dual-licensed centers.

Return to Top

---

# Error 60

### Quantity of Food Prepared was not Recorded with the Menu

KidKare Food Program can be configured to allow users to record actual quantities prepared/offered at any given meal service. This error only indicates that actual quantities were not recorded—it does not indicate insufficient quantities.

Return to Top

# Error 61

## No Receipts are on File for Center This Month

This error is generated as a warning message only to remind you to enter receipts (if it is part of your process).

Return to Top

---

# Error 62

## Child is Missing an F/R/P Application

This error is generated for children who do not have a Reimbursement Level specified in the CACFP tab on the View Child page.

> **Note:** This edit check is skipped for At-Risk-only centers, emergency shelters, and At-Risk meals for children enrolled in dual-licensed centers, as these children are always reimbursed at the Free level.

Return to Top

---

# Error 63

## Block Claim Detected

This error is generated if a block claim pattern is identified in the claim. A block claim is any claim where the same number of children are served any given meal or snack for 15 consecutively claimed days.

Return to Top

---

# Error 67

## Child not Participating in CACFP has been Removed from Claim Totals

You can enroll children who are specifically designated as not participating in the CACFP by setting the **Participates** slider in the **CACFP** tab on the **View Child** page to **No**. Children for whom this slider is set to No are specifically excluded from claim totals and (policy depending) any FRP participation counts/blended rates.

> **Note:** This edit check is skipped for At-Risk-only centers and the At-Risk potion of a claim for regular centers that operate At-Risk programs (and these children are reimbursed).

Return to Top

# Error 68

## School Aged Child Served Breakfast without Documentation

This error is generated if a school-aged child is served Breakfast and does not have school aged documentation on-file. This is subject to state policies, as some states require special documentation for school-aged children who are served breakfast.

Return to Top

# Error 69

## Child Claimed after IEF Expired. Child Reimbursed as Paid, Regardless of Classification

If a child is claimed in a month in which their income eligiblity expiration date passes (unless the date expires on the last day of the month), that entire month and any month thereafter, the child is treated as Paid, regardless of what FRP Reimbursement Level the child has.

> **Note:** This may be changed subject to updated guidance from the USDA, such as that the child keeps their existing FRP Reimbursement Level for the month in which the IEF expires and reverts to Paid only in subsequent months.

This edit check is skipped for At-Risk-only centers or the At-Risk portion of a claim for regular centers that also operate At-Risk programs, as all At-Risk children are classified as Free.

> **Note:** This warning also displays on the Center Error report by default. This is to remind centers to get new income eligibility forms.

Return to Top

# Error 70

## Child's In/Out Times Indicate Child Not Present at Meal

This error is generated if a child's In/Out times don't cover the time of meal service. For example, a Breakfast may be scheduled for 8AM - 9AM, but the child does not arrive until 11:00AM and is marked at Breakfast. In/Out times and meal counts are recorded on the **Attendance/Meal Counts** page.

This error can sometimes also be generated when there is bad meal time data in the **CACFP Meals** section of the **Site Details** page. For example, lunch times starting at 11:30PM or ending at 12:30AM can generate erroneous messages on the OER.

# Error 71

## A Meal was Claimed for a Meal Missing a Start/End Time Pair in the Center's File

This error is generated any time a meal doesn't have a properly defined starting and ending time in the CACFP Meals section of the Site Details page.
