Error Codes in This Article

Error 72

Child's In/Out Times were Missing or Incomplete for the Day

This error is generated if a child is noted as In, but does not have an Out time (or vice versa) recorded on the **Attendance/Meal Counts** page, subject to your policies.

Return to Top

Error 73

Child wasn't Claimed for a Meal, but In/Out Times Show Child was Present During Meal Service

This error lists any child not marked as served at a meal but *should have been*, based on the child's In/Out times for the day. For example, a child was checked in at 7:00AM and out at 4:00PM. Breakfast is noted as being served from 8:00AM - 9:00AM and the child isn't marked as present on the Attendance/Meal Counts page. That child is listed with this error.

This error is a warning only, as it indicates possible accidental under-counting. This error is subject to policy.

Errors 74-76, 80, 84-86, & 90

Meal Over Age Group Capacity

Some states require age group-specific capacity checking. If your state does require this, additional capacity fields display in the **License** section of the **Site Details** page. For example, you may have Infants, Toddlers, and Pre-Schooler fields to record capacities for different age groups.

When recording age group-specific capacities, KidKare allows you to designate that groups can be combined for

capacity purposes by including a negative sign for the capacity value. For example, a license may indicate that a total of 20 infants and toddlers and 30 preschoolers and school-age children can be recorded, for a total of 50 children overall. You would document this as follows:

Inf	Tod	Pre	Sch	Cap
20	20	30	30	50

Return to Top

Error 78

Quantity of Food Prepared was Less Than Quantity Required

If you record actual quantities served, this error is generated if the quantity served is less than the required quantities computed by KidKare.

To compare actual quantities served and actual quantities required, print the Menu Production Record and compare the Quantity Needed Per Actual Attendance field to the Actual Qty Prepared field. The value in the Actual Qty Prepared field must be higher than the value in the Quantity Needed Per Actual Attendance field.

Return to Top

Error 79

Quantity of Food Prepared was Recorded with a Measurement Type Inconsistent with the Quantity Required

This error is generated when the quantity measurement type you entered cannot be compared against the the quantity KidKare computed. This is typically the result of user error. For example, someone may have recorded that they served four gallons of ground beef, when they meant to enter pounds.

Return to Top

Error 81

No Infant Form on File

This error is generated if an infant is claimed and the **Infant Form on File** slider in the Infant tab on the **View Child** page is not set to **Yes**.

Return to Top

Error 82

A Withdrawn Child is Claimed Prior to the Date of Withdrawal, but the Child was Never Activated Before Being Withdrawn

This error is generated when a withdrawn child who was never activated is claimed prior to the withdrawal date. For example, you enroll a child and never activate them. You begin claiming the pending child, but the child withdraws from care a few days later. So, you withdraw the pending child and designate a withdrawal date as the last date the child was in care. When you calculate your claim, the child shows as claimed prior to the withdrawal date, but as never activated.

If you've received a valid enrollment form for the child and want to activate them, add an enrollment expiration date to the child record on the View Child page and click **Activate**.

Return to Top

Error 83

Menu Notes/Comments Have Been Supplied

This warning is generated if notes are added to the Menu Notes box on the Daily Menu page. This warning serves simply as a reminder to look at the notes. See **Menu Notes Report** for more information about quickly reviewing menu notes.

Return to Top

Error 87

Milk Audit Resulted in Milk Shortage

This error notes a milk shortage and the number of meals disallowed as a result. Your policies must stipulate that Milk Audit edit checks are set to warn or disallow and that milk audit disallowances are set to be applied using a monthly percentage instead of specific meals. For more information about the milk audit, see **Milk Audit**.

Return to Top

Error 88

For-Profit Center Does not Have at Least 25% Free or Reduced (At-Risk Still Allowed)

This is a variation of Error 53. This variation occurs if you're a dual child care center + At-Risk facility and are prevented from filing the child care center claim only.

Return to Top

Error 91

Infant Served Whose Parent Refuses Food

In most cases, most cases, infants can be reimbursed regardless of whether the parent brings food or not. This is because the labor involved with providing breast milk to infants is such that USDA policy reimburses the meals. However, your policies can allow KidKare Food Program to disallow reimbursement for any infant for whom the parent refused food you offer.

Return to Top

Error 92

A Pending Child was Claimed—No Signed Enrollment is on File—But the Child has an F/R/P Application

This error is generated if a Pending child who does not have a FRP reimbursement level set is claimed, policy pending.

> **Note:** The error behavior seems to be the opposite of error language. Contact KidKare support if you receive this error.

Return to Top

Error 93

This error is exactly like Error 92, except it applies to children who were withdrawn and never activated.

Return to Top

Error 94

A Child has Neither an Enrollment Form nor an F/R/P Application on File

This error is generated if a child is Pending and the child does not have an FRP reimbursement level set (policy dependent).

Return to Top

Error 98

Food was Claimed on a Date that Fell After the Food's Effective End Date

This error is generated when foods are claimed after their effective End dates. These foods are automatically disallowed. For more information about managing your foods, see **Add and Edit Foods**.

Error 99

Food was Claimed on a Date that Fell Before the Food's Effective Start Date

This error is generated when foods are claimed before their effective start date. These foods are disallowed. For more information about managing your foods, see **Add and Edit Foods**.

Error 100

At Least 1 Serving of Bread/Alternate Per Day Must be Whole Grain-Rich

This error is generated if none of the bread/alternate servings for a given day were marked as whole grain-rich. The meal pattern requires that at least one serving of bread/alternate must be whole grain-rich. The meal with the lowest reimbursement will be the meal with an error. For example, a snack will be found in error before meals, and breakfasts will be found in error before lunches and dinners. Only those meals and snacks that included a bread/alternate are included.

Error 101

A Particular Type of Food was Served too Often. Consider Other Foods for a Better Variety

This error is generated if food served violates a food rule you have set up. Each of your food rules can be set to warn or disallow. For more information about food frequency rules, see **Add Food Frequency Rules**.

Error 102

An Insufficient Combination of Foods were Served at the Given Meal(s)

This error is generated if food served violates a food combination rule you have set up. Each of your food rules can be set to warn or disallow. For more information about food combination rules, see **Add Food Combination Rules**.

Error 103

A Meal was Served in which Two or More components May Have Been Provided by the Parent

This error is generated if an infant's record indicates that the parent supplies formula/food and you serve a meal that contains two or more meal components (excluding formula/breast milk).

Return to Top

Error 104

The Child's Infant Feeding Form Indicates Parent Supplies Formula and Food

This error is generated if an infant's record indicates that the parent supplies formula/food and you serve a meal that contains two or more meal components (excluding formula/breast milk).

Return to Top

Error 105

Juice Cannot Be Served More than Once per Day to Non-Infants

This error is generated if a center serves juice to non-infants twice in a day.
